#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

This office action is in response filed on January 27, 2006. Original application contained Claims 1-32. Applicant previously amended 1, 16-18, 20, 29, 30, and 31. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. Therefore, presently pending claims are 1-32.

### ***Response to Arguments***

Applicant's arguments with respect to claim 1-32 have been considered but are moot in view of the new ground(s) of rejection.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I: Claims 1-19, drawn to detection the presence of an observing program, classified in class 726, subclass 24.

II: Claims 20-32, drawn to altering the operation of observer program by altering the program configuration data input and then observing the activity, classified in class 713, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

Art Unit: 2131

separately usable. In the instant case, invention I has separate utility such as specifically scanning separate portions on the computer system for detection of observer programs, whereas invention II is directed to alteration of program settings, parameters, or operational modes that have been previously set or initialized during initial system start. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. An amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
